Marmarino

MAP – Where Texture Meets Tranquility

Marmarino brings walls to life with a soft, velvety matte finish that exudes understated elegance. Its textured surface adds depth and character, turning flat walls into dynamic features. The gentle translucency allows light and shadow to dance subtly across the surface, creating an organic, naturally soothing ambiance.

With warm undertones and a handcrafted aesthetic, Marmarino introduces a cozy, inviting atmosphere—perfect for spaces that seek calm, comfort, and quiet sophistication.

Marmarino Micro Rough

Finish: Sophisticated Texture with Earthy Character

Achieved through the expert application of **2 coats of M-AVMN-15**, followed by **MAP Protective Coat**, this finish blends artisan technique with modern aesthetics. Multiple layers of **MARMARINO** are carefully applied and lightly burnished, resulting in a smooth yet tactile surface that carries a distinctive **micro-rough** texture.

The final appearance is **matte to subtly chalky**, offering an elegant, natural feel that complements both contemporary and classic spaces. Its muted texture captures soft light, adding depth and quiet character to any wall.

Marmarino Smooth

Finish: Refined Elegance with Timeless Appeal

Crafted with **3 coats of M-AVMN-18** and sealed with **MAP Protective Coat**, this finish showcases the subtle beauty of fine craftsmanship. Layers of **MARMARINO** are skillfully applied and gently burnished to achieve a **smooth, even surface** with a luxurious hand-polished look.

The result is a **matte to softly chalky** finish that radiates warmth and sophistication. Its minimalist texture reflects light in a calm, diffused manner—perfect for interiors that value grace, serenity, and timeless design.

Application Tools & Finish Disclaimer

Recommended Tools:

- SS Trowel
- SS Scrapper
- Roller
- Brush

Important Note:

The texture sample provided is a close representation of the intended color and finish. However, slight variations may occur in the final outcome due to differences in material characteristics, surface conditions, and the nature of manual application.

Texture paint is applied by hand, and as such, subtle differences in texture, tone, and finish are to be expected. These natural inconsistencies add to the handcrafted appeal but may not precisely match the physical sample.

We strongly recommend conducting a test application on a small area before proceeding with full-scale work. This ensures the desired effect is achieved and approved before final execution.
